RISK CONTROL

## LIFESAVER MOBILE

Simple fleet safety software that limits phone usage and speeding.

Help mitigate one of the largest causes of vehicle collisions, enforce your distracted driving policy and reduce your liability risk with the use of LifeSaver Mobile. This software helps companies prevent distracted driving by automatically detecting drives and blocking cell phone use while behind the wheel. It offers immediate driver self-correction, while providing managers visibility into the phone usage patterns of their employee drivers.

### How It Works:

LifeSaver Mobile teaches and enforces new driving behavior while promoting employee self-correction with real-time visual intervention and driver daily digests. It helps drivers quickly adapt to hands-free phone practice if there is a need to communicate while driving.

- **LifeSaver App** – With no hardware requirement, deployment is simple. Employees install the app and receive an invitation to connect to your organization's LifeSaver Fleet Portal.
- **LifeSaver Fleet Portal** – Provides fleet managers visibility, including insight into driver data, problems that need coaching and data to acknowledge superior driving practices. Configure criteria to fit your organization, including hours, violations and scoring.

### Benefits of Use:

- Low cost.
- Minimally invasive.
- Offers a high safety impact.
- Fast deployment. No additional hardware is required.
- Teaches employees hands-free practices.
- Provides fleet managers new safety visibility.
- Delivers proof of distracted driving policy compliance.
