

School Risk Management Network

RISK CONTROL

EMPLOYEE SAFE PROGRAM SUITE

Safety National's® strategic partnership with PublicSchoolWORKSSM offers our policyholders discounted access to the full EmployeeSafe Program Suite. This robust employee workplace safety program, built specifically for K-12 schools, includes comprehensive staff safety and health programs designed to reduce the frequency and severity of accidents and the expenses associated with workers' compensation claims, and decrease the need for substitute staff.

Benefits of Use:

- **One-stop, total school safety.** EmployeeSafe is a one-stop, school safety and risk management solution delivering automated programs addressing best practices in school safety, compliance with federal/state mandates, and adherence to board policies.
- **Little time required, year after year.** EmployeeSafe requires minimal time of district administration by providing highly-trained school safety advisors, research and program development personnel paired with proprietary web-based software and content.
- **Customizable and updated regularly.** Each EmployeeSafe program can be customized to meet unique district needs and is updated regularly, providing districts with peace of mind that they are always current with regulatory mandates, board policies and best practices in school safety.

The Safety National and PublicSchoolWORKS partnership provides a substantial discount for all mutual K-12 clients. Safety National will cost share by funding a portion of PublicSchoolWORKS access for K-12 policyholders with general liability or educators legal liability coverage.
