

STUDENT ACCIDENT MANAGEMENT PROGRAM

The Student Accident Management Program helps implement data-driven solutions to prevent, prepare and respond to student and visitor injuries and incidents.

The award-winning platform automates reporting, tracking and management of accidents, including online documentation of administered first aid, investigations, witness statements and other follow-up activities. As reports are submitted, the system immediately notifies and mobilizes key administrators to address their specific responsibilities.

Benefits of Use

- Streamlined reporting, managing and tracking of incidents involving students, contractors, parents, post-secondary students, visitors and volunteers.
- Provides data to identify opportunities for prevention of future incidents.
- Extensive research and development teams ensure the program is compliant with national and state mandates.
- Programs are customized to meet each district's unique needs.

The Safety National and PublicSchoolWORKS partnership provides a substantial discount for all mutual K-12 clients. Safety National will cost share by funding a portion of PublicSchoolWORKS access for K-12 policyholders with general liability or educators legal liability coverage.

LEARN MORE:

Contact Safety National's Risk Control Department at 888-995-5300 or Risk-Control@safetynational.com.
