

RISK CONTROL

Automated Optical AI Firearm Detection

ZeroEyes provides a vigilant layer of protection to help stop gun-related violence—potentially before it even begins. An AI-powered solution with expert, human-verified backing, ZeroEyes can proactively identify emerging firearm threats at their earliest stages.

The Value of ZEROEYES™

24/7/365 Safety Assurance

Around-the-clock surveillance from military- and law-enforcement-trained analysts in the ZeroEyes Operations Center (ZOC)

High-Speed Data Precision

Over three billion images analyzed each day from security camera video feeds. No facial recognition, voice recording, or other invasive measures.

Seamless Integration and Ease of Access

Quick remote or on-site installation process with user-friendly desktop and mobile interfaces

Next-Level Situational Awareness

Detailed, crucial intel—including suspect description, location, direction of travel, and type of weapon—empowers onsite teams and local police to respond with confidence.

How It Works

Step 1: Detection.

ZeroEyes monitors for firearms in real-time, integrating with your existing security system to provide instant detection through focused live feeds.

Step 2: Verification.

All ZeroEyes firearm detections are reviewed immediately by ZOC analysts, who only review images in which suspected firearms are detected.

Step 3: Response.

When ZOC analysts confirm a suspected firearm, ZeroEyes' system notifies your teams and local law enforcement, often within around 3 to 5 seconds.

Save Time. Save Lives.

Protect your people and property from gun-related violence. Contact Safety National's Risk Control Department at 888-995-5300 or Risk-Control@safetynational.com to learn how ZeroEyes can help.
