

AI-Powered Risk Mitigation

RISK CONTROL

REDUCE LIABILITY RISKS WITH SMARTER EVERYDAY PROTECTION.

Safety National partners with IntelliSee to help policyholders reduce exposure to general liability risks, workplace injuries, and costly litigation. IntelliSee's AI-powered computer vision platform utilizes your existing security cameras to detect risks in real-time, providing early warnings, valuable documentation, and actionable insights that help prevent incidents before they escalate into claims.

Superior Safety Intelligence

Around-the-Clock Active Monitoring

Always on and always aware, IntelliSee uncovers hidden threats at their earliest stages, triggering proactive alerts at first notice, while driving swift action before incidents escalate.

Better Protection for a Stronger ROI

IntelliSee complements existing infrastructures to help prevent costly accidents, ultimately protecting your personnel, while boosting workplace efficiency.

Effortless Integration

No expensive upgrades or complicated installations. IntelliSee pairs simply with your security camera system, providing full-perimeter risk detection.

Incident Documentation Support

IntelliSee automatically captures verified alerts with targeted data, strengthening post-incident review and claim defense activities.

Vigilance From Every Angle

Slip, Trip & Fall Prevention

Detects spills, leaks, or fallen individuals, helping teams respond before injuries or liability claims occur.

Trespassing & Intrusion

Detects when individuals enter restricted areas, protecting against theft, vandalism, or injury-related lawsuits.

Violence & Security Risks

Alerts cases of loitering, after-hours activity, or other suspicious behavior that could escalate liability incidents.
